

Source Normalized Impact per Paper (SNIP)

گروه علم سنجی وزارت بهداشت

SNIP (Source Normalized Impact per Paper) is the ratio of a source's average citation count per paper and the 'citation potential' of its subject field. SNIP is based on Scopus citation data and allows direct comparison of sources in different subject fields.

Use SNIP when you want to account for variations in citing patterns within disciplines or are investigating across different fields, and publications are indexed in Scopus.
